ARCHITECTURAL ALUMINIUM WINDOWS & DOORS

TRUST
INSTALLATIONS

WHY CHOOSE ALUMINIUM

Renowned for its perfect combination of light weight and high strength, aluminium is the ideal material for sliding, folding doors and windows, providing slim, elegant designs and outstanding performance.

With a life-span measured in decades rather than years, together with extremely low maintenance requirements, aluminium has become the perfect choice for home owners.

THE SMART CHOICE

All our systems are designed with performance, looks and efficiency in mind, with each frame incorporating a 'thermal-break' to insulate windows and doors against heat loss, raise the internal temperature of a house and help reduce the risk of condensation.

Maintenance for aluminium systems is simple and straightforward, with a routine 'wipe-clean' all that is required to keep the products looking their best. With no requirement for re-painting or re-varnishing, aluminium windows and doors will never fade, deteriorate or rust, even in harsh environments, or coastal locations.

QUALITY

Each of our products come with all the assurance you would expect from the UK's leading aluminium system.

Manufactured using state-of-the-art machine centres and dedicated production lines ensures you have precision engineered aluminium products every time.

SAFE & SECURE

Using police approved multi-point locking systems and the UK's most secure cylinder, we really have your security covered.

Ultions key features include:

- ◆ Double snap resistance
- ◆ Unique lock down mode
- ◆ 11 Individual pins
(twice as many as standard cylinders)
- ◆ Nearly 300,000 key combinations
- ◆ Anti drill, pick and bump

OPTIONS

Available in a range of opening configurations to suit any application, Visofold doors can be folded internally or externally and with the opening at the side (so the sashes all fold one way), at one end (to create a single entrance door) or in the middle (to give the option of a double door).

Visofold's flexibility makes it the ideal choice for projects where large, uninterrupted openings are required, with the system providing maximum light and space to give unimpeded views.

The highly-versatile, easy-to-operate system is the perfect option for even the largest project, capable of opening up an entire wall, yet presenting a contemporary, elegant glazed façade when closed.

Visofold 1000

Application	Domestic / Commercial
Finish	Single / Dual colour, marine quality polyester powder coated
Profile	Round / Square
Lock Mechanism	Ultion (diamond accredited) Cylinder as std.- multi-point locking
Frame depth	70mm
Typical sight line	122mm
Max sash weight	100kg
U Value	1.3-1.5 w/m²k
Min - Max o/a height (per sash)	1850 - 2500mm
Min - Max o/a width (per sash)	700 - 1200mm
Security tested	PAS 24: 2012 DOC Q Optional Upgrade
Weather tested	BS 6375 Part 1: 2009
Glazing	DG 28mm, 36mm
Add ons	20mm, 42mm
Bead	Internal Only
Cills	85mm, 150mm, 190mm, 225mm, 300mm
Open In	Yes (Open inward doors have 25mm clearance only)

Visofold 1000 Slim profiles feature a thermal break to deliver enhanced thermal performance and energy efficiency and security is assured by multi-point lock mechanisms on the main opening sashes, and shoot-bolt locks on the 'floating' mullions.

The doors can have either a low threshold for unimpeded access, or a rebated threshold for improved weather resistance.

Visofold 1000 Slim doors are available in a choice of standard or non-standard colours, including metallic, dual colour and unique Sensations range of textured finishes.

With internal glazing beads preventing the removal of glass from outside, and high security locking mechanisms in the handle, our doors are built to last and to be secure.

ALITHERM 400

WINDOWS

The Alitherm 400 window is the first thermally broken aluminium system to feature Smart's pioneering coextruded glazing gasket. This means the beads are supplied with the glazing gasket post-extruded into the profile. This enables the Quick-Glaze beads to be simply tapped in on site, significantly reducing fabrication and installation time.

Available with a square profile, the slim sight lines of Alitherm 400 provide excellent weather and thermal performance, as well as the security assurance provided by PAS24 accreditation. While the flush, flat face option is suitable for off-set, face-mounted espagnolette locks.

HERITAGE RANGE WINDOWS

Alitherm Heritage provides the ideal solution for heritage applications such as listed building renovations and large scale replica-refurbishment projects where planning constraints are to be considered.

The Alitherm Heritage window is designed to be built as a series of horizontal modules which can be stacked using horizontal couplers to form a multi-part window featuring a specially design drip bar between modules.

HERITAGE RANGE DOORS

The Smart Alitherm Heritage door is the ideal replacement for steel balcony doors on heritage applications such as building renovations or apartment conversions. The Alitherm Heritage door provides the solution for conservation areas where planning regulations require a like-for-like product replacement.

Alitherm Heritage door profiles feature the system's signature slim sightlines and elegant lines that complement Smart's existing Alitherm Heritage window and mimic those of steel doors. The system has all the advantages of modern aluminium profiles that feature polyamide thermal breaks, allowing the system to achieve a U Value of 1.5 W/m²k when installed with a suitable sealed unit.

SMART WALL

Smart Wall is a thermal shop front screen and door system suitable for all types of ground floor treatment where enhanced thermal performance is required. The system is ideal for use in schools, colleges and other educational buildings.

Smart Wall has been successfully tested to PAS 24:2012, LPS 1175 level 2 and BS EN 1627 Level 3 for enhanced security performance making the door one of the best performing fully thermally broken screen and entrance doors available in the UK. Screen work is either beaded or pocket glazed. Smart Wall complies with the latest requirements of Document L for thermal transmittance.

Smart Wall	
Application	Commercial
Finish	Single / dual colour, marine quality polyester powder coated
Profile	Flat
U Value	1.8 w/m ² k Doors / 1.4 w/m ² k Screens
Security	Ultion (diamond accredited) Cylinder as standard - Hook lock
Profile depth	100mm
Profile width	53mm
Single Door Max Width (mm)	1100mm (per sash)
Single Door Max Height (mm)	2500mm (per sash)
Single Door Max Weight (kg)	80kg
Add ons	53mm
Bead	External
Cills	85mm, 150mm, 190mm, 225mm, 300mm
Glazing	DG 28mm

Smart Wall doors are weather rated to BS 6375 and are available with anti-finger trap door sections and drainable low thresholds.

All profiles feature polyamide barriers to maximise thermal performance and can be internally or externally glazed. Unlike non-thermal alternatives, Smart Wall is available in dual colour from an extensive range of standard and non-standard finishes. Smart Wall complies with the latest requirements of Document L for thermal transmittance.

Midrail option for doors

Vertical section

Horizontal section

SHOPLINE

Shopline is a modular screening solution, combining the benefits of off-site manufacture with on-site assembly. Screen modules are constructed off site from square cut profiles joined using self tapping screws. These modules can then be rapidly assembled on site, intuitively clipping together the mullions to form one continuous screen.

Shopline	
Application	Commercial
Finish	Single colour marine quality polyester powder coated
Profile	Flat
Security	Ultion (diamond accredited) Cylinder as standard - Hook lock
Profile depth	100mm
Profile width	50mm
Single Door Max Width (mm)	1100mm (per sash)
Single Door Max Height (mm)	2500mm (per sash)
Single Door Max Weight (kg)	110kg
Add ons	50mm
Bead	External
Cills	85mm, 150mm, 190mm, 225mm, 300mm
Glazing	DG 24mm

This rapid assembly method offers an economical solution for low rise screening with slim sightlines of 50mm. Designed for the UK climate, all fixings on the screen are manufactured from corrosion resistant material to provide protection from both atmospheric and electrolytic degradation. The system offers drainage trays, ensuring the screens performance in all weathers.
